

## Bufftech PVC Railing

### Rail Sections

Overall section-lengths 72” or 96”, but 96” section-lengths in stock. Includes upper and lower rails (routed to accept pickets). Each rail is supplied with aluminum internal ‘U’ shaped reinforcement channel to secure the individual pickets. Rail-sections will be assembled and can be easily trimmed to the desired length on site.

### Rail Posts

Our 4” X 4” fence-posts are supplied either blank or routed to accept the above-described rails depending on their position in the rail-line; ‘Corner-posts’, ‘Line-posts’, ‘End’-posts’. Each post can be cut on site to the desired length.

### Post Caps

Supplied in your choice of three different styles; ‘Flat’, ‘Gothic’, or ‘Ball’. The individual post-caps are supplied with stainless steel installation screws, with trim-washers and white PVC finishing snap-caps.

### Socket Gate Kits

Include a pair of socket gate uprights, pair of self-closing nylon gate-hinges, a gravity latch, a diagonal brace, and all screws, bolts and fastenings. The rails and pickets to make up the gate width can be acquired from any extra railing material, or perhaps the railing installation off-cuts.
